

# Classroom Attention Analytics Report

Session ID: 923673db | Generated: 2026-09-10 00:50:11

## Executive Summary

| Metric                          | Value        |
|---------------------------------|--------------|
| Average Class Attention Score   | 0.6 / 100    |
| Unique Students (anonymous IDs) | 2            |
| Attentive observations          | 0 (0.0%)     |
| Distracted observations         | 0 (0.0%)     |
| Drowsy observations             | 477 (100.0%) |
| Unknown / insufficient data     | 0 (0.0%)     |
| Total Alerts                    | 4            |

## Anonymous Per-Student Summary

| Student ID | Avg Attention | Dominant State | Indicator                 |
|------------|---------------|----------------|---------------------------|
| Student #1 | 0.5           | Drowsy         | Consider breaks / fatigue |
| Student #2 | 56.2          | Drowsy         | Consider breaks / fatigue |

## Sustained Low-Attention Alerts

| Time     | Student    | Type   | Message                                       |
|----------|------------|--------|-----------------------------------------------|
| 00:50:00 | Student #1 | Drowsy | Sustained Drowsy state for Student #1 (>= 4s) |

## System Limitations

**SYSTEM LIMITATIONS:** This system estimates visual proxies for attention (head orientation, approximate gaze direction, eye-openness). It does NOT measure cognitive attention, learning, or comprehension. The XGBoost model was trained on synthetically generated data; real-world accuracy has not been independently validated. Results should be used only as a rough teaching aid, not as evidence of individual student performance or conduct.

## Privacy Safeguards & Legal Notice

**PRIVACY SAFEGUARDS:** Video is processed entirely on-device. No raw video frames are stored. Only numeric metrics and anonymous student IDs are logged. Facial recognition is not implemented. Institutional ethical review and informed consent from students and parents/guardians are REQUIRED before any real-world deployment. Compliance with applicable data-protection laws (e.g., DPDP Act, GDPR) must be verified by qualified legal counsel — this software alone does not constitute legal compliance.
